

## Building and Running

Change directory to Homework folder with pom.xml:

```
cd ../Homework
```

Compile and run application, with argument indicating the data file\*:

```
mvn spring-boot:run -Drun.arguments="books.json"
```

Application will be run at port: 8080

Dashboard:

open from HomeworkWebApp folder file: index.html\*\*

\*The data file must be in **Homework\src\main\resources\json**

\*\*Tested on: Firefox or Chrome (Chrome with enabled cross-origin resource sharing)
